

# Introducing the New Edwards Tricentrix Holder System

**Ultra-low Holder Profile Configuration** – Flush against the sewing ring, the ultra-low profile provides great visualization and operative space to ease implantation in a variety of techniques.

**Quick Handle Release** – One cut releases the handle from the holder increasing your operative space. Potentially decreasing operating time and eliminating displacement of the valve from rotation during removal with traditional handle.

**One-piece Removal** – Simply cut the green sutures within the holder notches for quick and easy removal of the holder after completion of implantation.

**The New Tricentrix Holder System.** . . A concentric, tri-tent system designed to minimize suture entrapment. Along with features for ease of use, the Tricentrix holder system maximizes your implantation experience with the Carpentier-Edwards PERIMOUNT Plus Mitral Pericardial Valve.

Carpentier-Edwards PERIMOUNT Plus  
Mitral Pericardial Valve Model  
6900P with Tricentrix Holder System

Certified according  
to European MDD
